FEEL WELCOME

"Feel welcome" is our guiding principle at Schönbuch. We design and develop creative, functional furnishing elements and concepts for entryways, offices and other spaces so that they perform to their full potential and meet the needs of their users. Ideally, entryways and offices should create an immediate impression of competence. They should be representative and orderly, with a clear structure and useful storage. The corridors and hallways that connect the various spaces in a building are frequently used, not only to move between areas but also to welcome customers, clients and business partners. Along with offices, hotels and public spaces, these are exactly the spaces Schönbuch has in mind as it develops its well thought-out solutions. The Schönbuch collection is constantly being enhanced to create contemporary, design-focused interiors. Its products meet the most exacting standards for quality, design, materials and craftsmanship. Their designs are inspired by their function and realised by innovative methods in precious woods, with nuanced paint finishes that are characteristic of our collection, clear forms and high-quality handcrafted details. For spaces in which to enjoy living and working.
