

A woman with blonde hair in a bun, wearing a black dress, sits on a white plastic chair on a rocky shore. Several other white plastic chairs are scattered around her, some on the rocks and some in the shallow water. The background shows the ocean and a clear sky.

VOINDOM

PP | POLYPROPYLENE

“ECOLOGICAL, LIGHTWEIGHT AND RESISTANT”

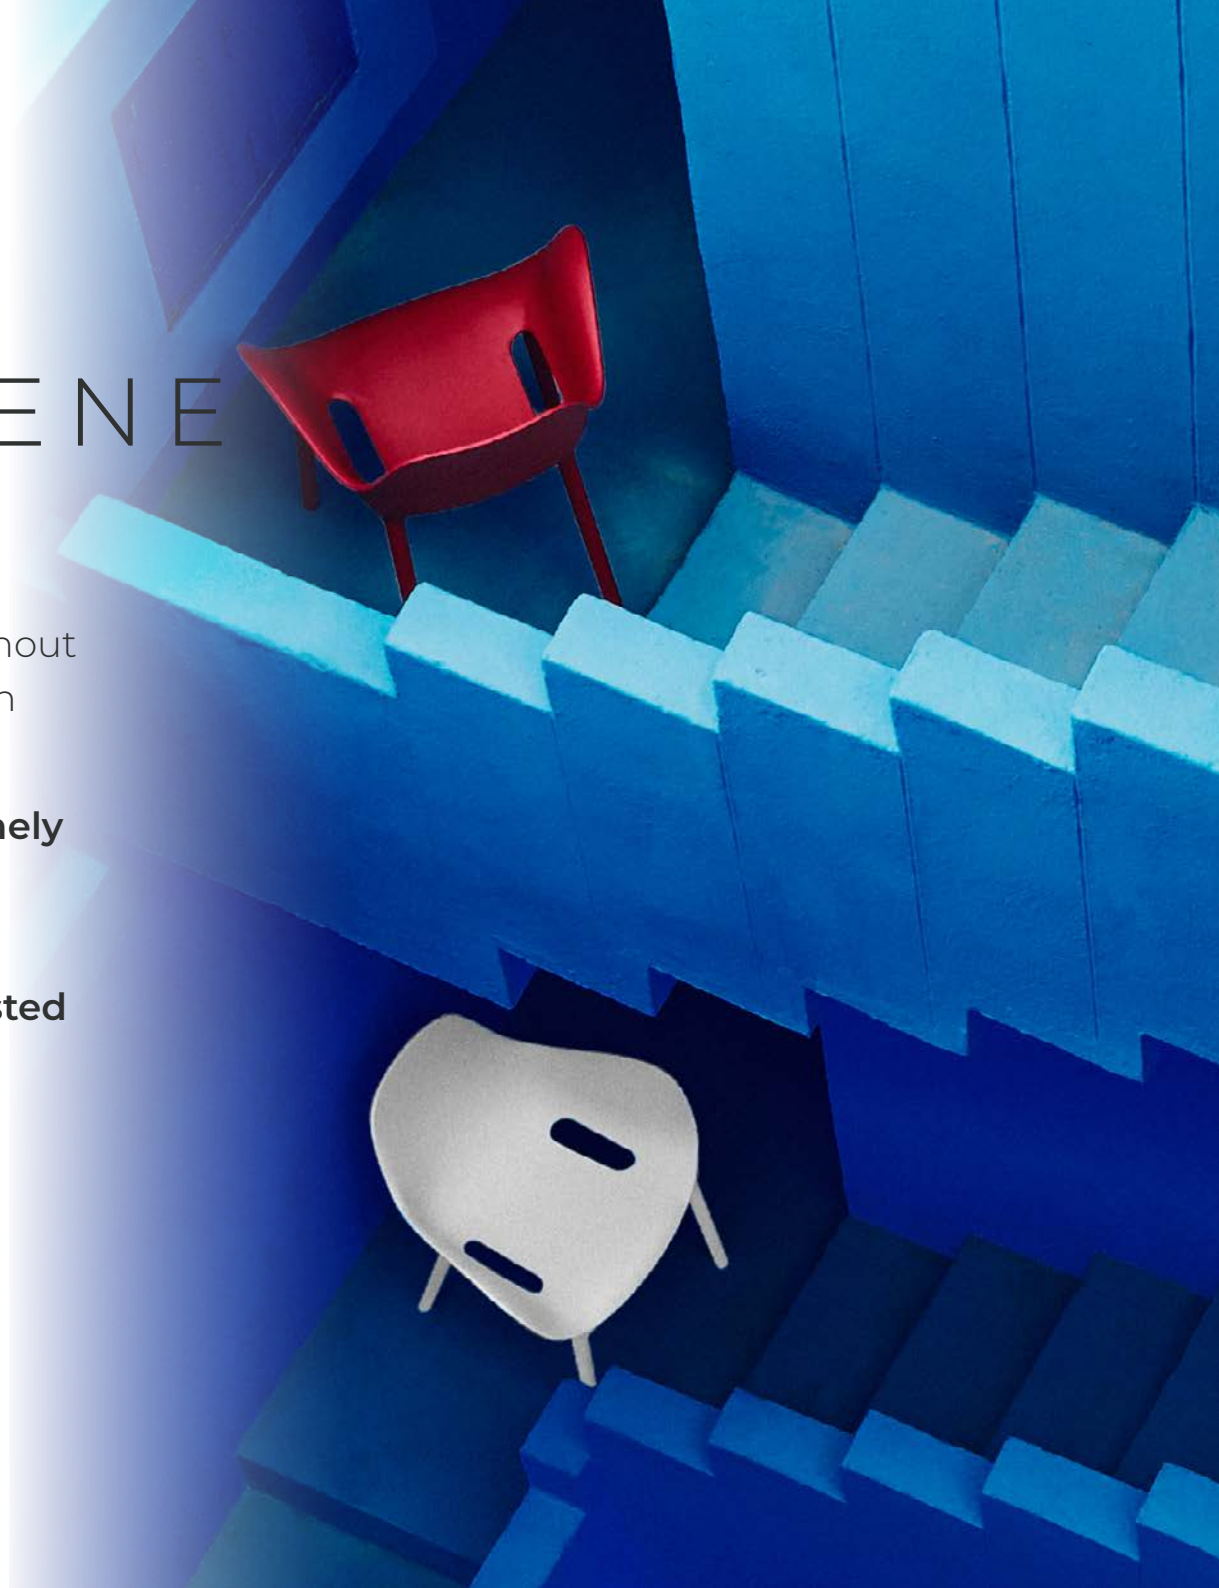

POLYPROPYLENE

It is a **thermoplastic polymer** that is flexible at high temperatures, withstands up to 150°C without deformation or degradation, and hardens when sufficiently cooled.

It is **ecological, resistant, reusable and extremely versatile**.

At Vondom we are committed to technological innovation through the **technique of gas-assisted injection of polypropylene** reinforced with fibreglass.

BIFMA

A modern interior scene featuring several white, angular, geometric pieces of furniture. On the left, there is a lounge chair with a high backrest and a matching ottoman. In the center, there is a chair with a high, angular backrest. On the right, there is a tall, narrow table or side table with a similar angular design. The background is a wall of vertical wood panels, and the floor is a light, neutral color. The lighting is soft and even, highlighting the clean lines and geometric forms of the furniture.

MANUFACTURING

The manufacturing process consists of melting the plastic which, once in a liquid state, is injected under pressure into the cavity of a mould until it is filled. Once solidified, the result are **attractive, original and functional products** that are easy to maintain.

We apply this technique to **chairs, tables, sun loungers and flower pots.**

LIGHTWEIGHT

Our propylene collections are the ideal choice for HORECA projects. It is a very light material and **allows the pieces to be stackable and easy to transport.**

RESISTANCE

Polypropylene is highly **resistant to ambient temperature, knocks and scratches, humidity, heat and cold.**

It is a material with an extraordinary persistence over time, which guarantees a **durable and resistant product.**

TREATMENTS

Our propylene products are **UV treated** to prevent damage from outdoor weathering.

In addition to the **anti-static treatment** for easy cleaning.

SUSTAINABILITY

At Vondom we integrate eco-intelligence into our values. With this in mind, we champion Vondom Revolution, a philosophy based on the creation of **unique and timeless pieces with recycled polypropylene materials** in a firm commitment to the future and innovation.

All Vondom products with recycled polypropylene can be [found here](#).

CLEANING AND CARE

Our production is governed by the standards of our quality assurance system ISO 9001:2008 and environmental system ISO 14001:2004. And we use only the **highest quality materials** to guarantee a long product life.

Steps to clean outdoor furniture:

1. Spray a grease remover on the surface to be cleaned.
2. Rub with a damp cloth and water.
3. Rinse with plenty of water using a pressurised water system. Caution! Do not use the pressure washer on upholstery and lacquered finishes.
4. Leave to dry outside.

CLEANING AND CARE

Exposure to the sun, especially dark colours, can cause injury through skin contact. Be careful to **check the temperature of the furniture before use during** hours of extreme sunlight.

Place the piece on a **regular surface without slope** to avoid uncontrolled displacements.

For a better conservation of the furniture, it is advisable to **cover each item**.
