Wood

Wood

At Vondom we are always in search of natural beauty, which is why we are committed to organic materials such as wood, giving our collections a unique personality.

We incorporate different woods for our furniture, with a warmer and more relaxed style. A material that enhances the beauty of the environment in which they are placed, turning it into wonderful spaces where we feel like feeling, living and enjoying.

Teak wood

It stands out for its resistance to extreme weather conditions and water. In addition, it has a natural oil coating that makes it impermeable, prevents rotting and provides resistance to fungi, termites and wood-boring pests.

A proposal for outdoor furniture that Vondom offers in two finishes: natural and aged.

* Natural teak acquires a beautiful silver-grey patina over time. This ageing process varies depending on the climate.

Durability

Teak is one of the woods that best withstands the different best resistant to the different outdoor degrading agents.

These can be abiotic agents: atmospheric (rain, sun), mechanical (scratches, knocks) or chemical (bleaches, acids).

Or biotic agents: fungi, rot and insects.

Climate on teak

The sun causes a surface degradation that turns the wood greyish (photodegradation).

Some customers look for this aged appearance in their products over time.

Moisture causes a dimensional change in the wood which can lead to cracking. This should be considered a normal and natural process.

Teak can sweat out its internal oil. This will always happen due to a sudden absorption of a sudden absorption of a large amount of water (heavy rain).

Example of sun-degraded wood.

Iroko wood

It is a tropical wood well known for its strength, stability and durability.

It has an antiseptic resin that makes it resistant to attack by various organisms such as termites or fungi.

It is a very versatile material, 100% recyclable, a perfect solution for both indoor and outdoor furniture.

Ash wood

A very versatile wood that offers an excellent performance, quality and resistance.

At Vondom we use ash wood to the legs of tables and chairs, available in two shades.

They are ideal pieces for covered outdoor spaces.

Cleaning and maintenance

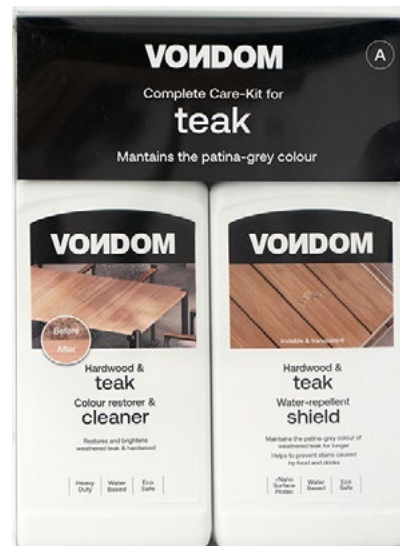

Our production is governed by the standards of our quality assurance system ISO 9001:2008 and environmental system ISO 14001:2004. And we use only the highest quality materials to guarantee a long product life.

Steps for the correct maintenance of furniture:

- Clean with soap and water.
- Furniture, cushions and covers should be clean and dry before covering.
- Cushions should be removed - where possible - before rainy days to prevent mould and mildew.
- If cushions get wet, lay them on their side with the zip down and unzip them to ensure that all water drains out.
- Avoid getting water on the surface of the furniture.
- For better preservation of the furniture, it is advisable to cover it with covers.

Limpieza y cuidados

En Vondom nos preocupamos por el cuidado y mantenimiento de tus muebles de teca, asegurando que se mantengan en óptimas condiciones a lo largo del tiempo. Por eso ofrecemos dos packs de cuidado compuestos por Teak Cleaner, Teak Shield y Teak Protector, tres soluciones profesionales para un cuidado específico de la teca.
